

# Child Death Scene Investigation Learning Series

## OVERVIEW

The National Center for Fatality Review and Prevention invites participants to take its new 10-module training series touching on the nuts and bolts of child death scene investigation (DSI), with a special focus on sudden and unexplained deaths. This series is for interdisciplinary professionals who either conduct DSI or use the information collected in DSI for community-level response, child death review, fetal and infant mortality review, or other important agency functions.

To learn more, visit <https://www.ncfrp.org/center-resources/child-dsi-learning-series/>. To access the training series, [create an account at course.mihealth.org Public Learning Management System \(LMS\)](https://www.ncfrp.org/center-resources/child-dsi-learning-series/) and look for the [Child Death Scene Investigation Learning Series \(CFRP-DSI\) Course](https://www.ncfrp.org/center-resources/child-dsi-learning-series/). **Please share this opportunity with your colleagues!**
