

Child Death Review Case Reporting System

Case Report - Version 4.1

Instructions:

This case report is used by Child Death Review (CDR) teams to enter data into the National CDR Case Reporting System. This system is available to states from the National Center for Fatality Review & Prevention and requires a data use agreement for state and local data entry. System functions include data entry, case report, editing and printing, data download and standardized reports.

The purpose of this form is to collect comprehensive information from multiple agencies participating in a child death review. The form documents demographics, the circumstances involved in the death, investigative actions, services provided or needed, key risk factors and actions recommended and/or taken by the CDR team to prevent other deaths.

While this data collection form is an important part of the child death review process, the form should not be the central focus of the review meeting. Experienced users have found that it works best to assign a person to record data while the team discussions are occurring. Persons should not attempt to answer every single question in a step-by-step manner as part of the team discussion. The form can be partially filled out before a meeting.

It is not expected that teams will have answers to all of the questions related to a death. However, over time teams begin to understand the importance of data collection and bring the necessary information to the meeting. They find that the percentage of unknowns and unanswered questions decreases as the team becomes more familiar with the form.

The form contains three types of questions: (1) Those that users should only select one response as represented by a circle; (2) Those in which users can select multiple responses as represented by a square; and (3) Those in which users enter text. This last type is indicated by the words 'specify' or 'describe'.

Most questions have a selection for unknown (U/K). A question should be marked 'unknown' if an attempt was made to find the answer but no clear or satisfactory response was obtained. A question should be left blank (unanswered) if no attempt was made to find the answer. 'N/A' stands for 'Not Applicable' and should be used if the question is not applicable.

This edition is Version 4.1, effective June 2016. Additional paper forms can be ordered from the National Center at no charge. Users interested in participating in the web-based case reporting system for data entry and reporting should contact the National Center for Fatality Review & Prevention. This latest version incorporates the Sudden and Unexpected Infant Death (SUID) Case Registry and the Sudden Death in the Young (SDY) Case Registry questions.
