SAVING LIVES TOGETHER

Instructions:

This case report is used by Fetal and Infant Mortality Review (FIMR) teams to enter data into the National Fatality Review Case Reporting System (NFR-CRS). The NFR-CRS is available to states and local sites from the National Center for Fatality Review & Prevention (NCFRP) and requires a data use agreement for data entry. The purpose is to collect comprehensive information from multiple agencies participating in a review. The NFR-CRS documents demographics, the circumstances involved in the death, investigative actions, services provided or needed, key risk factors and actions recommended and/or taken by the team to prevent other deaths.

While this data collection form is an important part of the FIMR process, it should not be the central focus of the review meeting. Experienced users have found that it works best to assign a person to record data while the team discussions are occurring. Persons should not attempt to answer every single question in a step-by-step manner as part of the team discussion.

It is not expected that teams will have answers to all of the questions. However, over time abstractors and teams begin to understand the importance of data collection and will make efforts to incorporate necessary information into the case summary. The percentage of cases marked "unknown" and unanswered questions decreases as the team becomes more familiar with the form.

The NFR-CRS Data Dictionary is available. It contains definitions for each data element and should be referred to when the team is unsure how to answer a question. Use of the data dictionary helps teams improve consistency of data entry.

The form contains three types of questions: (1) select one response as represented by a circle; (2) select multiple responses as represented by a square; and (3) free text responses. This last type is indicated by the words "specify" or "describe."

Many teams ask what is the difference between leaving a question blank and selecting the response "unknown." A question should be marked "unknown" if an attempt was made to find the answer but no clear or satisfactory response was obtained. A question should be left blank (unanswered) if no attempt was made to find the answer. "N/A" stands for "not applicable" and should be used if the question does not apply.

HIPAA Reminder:

Enter identifiable information (**names, dates, addresses, counties**) into the NFR-CRS if your state/local policy allows. Follow your state laws in regards to reporting psychological, substance abuse and HIV/AIDS status. Please check with your fatality review coordinator if you are unsure. For other text fields, such as the **Narrative section or any "specify" or "describe" fields**, do not include specific names, dates of birth, dates of death, references to specific counties, practitioners, or facility names in these text fields. Examples: "Evans County EMS" should be "EMS"; "Evans County Children's Hospital" should be "the children's hospital."

Why this reminder? Text fields may be shared with approved researchers as noted in our Data Use Agreements. Therefore, entering identified data into those fields would compromise your responsibility under HIPAA.

Additional paper forms can be ordered from the NCFRP at no charge. Users interested in participating in the NFR-CRS for data entry and reporting should contact the NCFRP.

O. NARRATIVE

O1. NARRATIVE

Use this space to provide more detail on the circumstances of the death and to describe any other relevant information. DO NOT INCLUDE IDENTIFIERS IN THE NARRATIVE such as names, dates, addresses, and specific service providers. Consider the following questions: What was the child doing? Where did it happen? How did it happen? What went wrong? What was the quality of supervision? What was the injury cause of death? The Narrative is included in de-identified downloads, and per MPH/NCFRP's data use agreement with your state, HIPAA identifying information should not be recorded in this field.
